

Week of 9/23/24 - 9/27/24 Home Economics

This week the students will be learning about milk, cheese, and yogurt.

They will discover how milk, cheese and yogurt fit into a healthy eating plan, how to store and select milk, yogurt, and cheese and how to cook with milk. They will also learn yogurt and cheese. Some of the terms they will learn are: curd, whey, pasteurized, homogenized, curdle, and reconstitute. We will be making homemade macaroni and cheese as our cooking activity this week.
