

Home Economics 10/21-10/25

We are basically leaving the cooking part of our Home Economics curriculum and will start to learn to sew.

This week the students will be learning how to thread a needle, make a knot with thread, sew on a button, and start to learn different stitches.

We will also start a fall art project using the stitches they will learn to do.

We will eventually learn how to use a sewing machine and make a project with it.

Thank you,

Mrs. Hilborn

Home Economics Teacher
