s, x, e, d

Her First Nurse Works
Early

This coming week we will be working on perimeter, temperature, missing numbers, story problems, simplifying expressions, measurement, number lines, place value, and expanded form.

We are working on learning multiplication facts, as your student need to know those for life.

NumberRock videos on Youtube are free and can help your student learn multiplication facts.

MONDAY, SEPTEMBER 2
is a HOLIDAY.
There is NO SCHOOL that day!

To contact me:

Marguerite.mcpherson@fppsphoenix.net

Or 602-870-6674 ext 503

Please feel free to send a text message any time.

Your students have Science and Social Studies with Mrs. Panthaky. Next week they will be learning about a map grid (Map Skills) and "From Boy to President."

In Science, they will be going over "Why Do Some Plants Have Fruits?" and "Fright On Carpenter's Peak".

Please DO sign off on your student's homework log each night to let us know that you did listen to your student read. **We need them to NOT RUSH through the questions they need to answer each day (usually 3 questions). We can tell they are not taking their time when their answers do not fit with what they questions are.**

Please let me know if your student needs more help with Math homework. I can help them before school or for 5-10 minutes during their lunch recess, which is 20 minutes long.
